Private key protection

To maintain security, the private key was protected with a password.

Type the password for the private key.

Password:

Display Password

Import options:

Enable strong private key protection. You will be prompted every time the private key is used by an application if you enable this option.

Mark this key as exportable. This will allow you to back up or transport your keys at a later time.

Protect private key using virtualized-based security(Non-exportable)

Include all extended properties.
